TRACK-IT DATABASE SOFTWARE

DO YOU WANT TO KEEP TRACK OF YOUR SAMPLE STORAGE TUBES? THE LABORATORY SAMPLE MANAGEMENT SYSTEM TRACK-IT CAN HELP YOU MANAGE YOUR SAMPLES AND KEEP TRACK OF ALL ACTIVITIES AND ALIQUOTS. THE DATABASE SOFTWARE WILL HELP YOUR LABORATORY TO CARRY OUT BIOBANKING QUICKLY AND EASILY - NO MORE PAPER RECORDS OR LOSE EXCEL FILES.

Track-IT is a Laboratory Sample Management System (LSMS) that allows you to organize and track individual samples in your sample library. Track-IT is compatible with 1D rack barcode and 2D tube code scanning, in turn allowing you to catalogue samples that have been scanned by lab equipment, such as readers and scanners.

The Micronic Tracxer Code Reader Software is fully integrated with Track-IT so that users can directly trigger tube or rack barcode scanning from the Track-IT program. The database software enables users to scan barcodes in only 5 seconds and transfer the codes directly into Track-IT. This way laboratories can markedly speed up their sample storage process compared to database programs in which users need to upload spread sheets with scanned codes.

The Track-IT database software is customizable to match the workflow of your laboratory, as well as to match the unique aspects of each of your samples.

The main concept behind Track-IT is that each scientist in the lab can manage data and information quickly and make it available to the rest of the lab community. Via Intranet support, data can be accessed from any connected computer in the laboratory, which accelerates information retrieval.

Laboratory staff in turn spends less time on recurrent and time-consuming operations and dedicate more precious time to research activity.

INFORMATION

- Central information database
- Quick information retrieval
- Alerts system
- Cross-database searches
- Uniform data presentation
- Perpetuation of information & traceability
- Data reports export (screen and MS-Excel)
- Automatic data imports
- Versatile administration
- Upgradable
- 1 licence per database can cover all the lab users

MICRONIC

MICRONIC I SAMPLE HANDLING I EQUIPMENT & SOFTWARE

SPECIFICATIONS

ALL-IN-ONE AUTOMATIC WINDOWS INSTALLER

SERVER SYSTEM REQUIREMENTS: WINDOWS 2000/XP/VISTA, 2X USB PORTS
CLIENT SYSTEM REQUIREMENTS: WINDOWS/MACOS X/LINUX + INTERNET BROWSER (INTERNET EXPLORER 6+, FIREFOX 2+, SAFARI 2+, OPERA 8+)
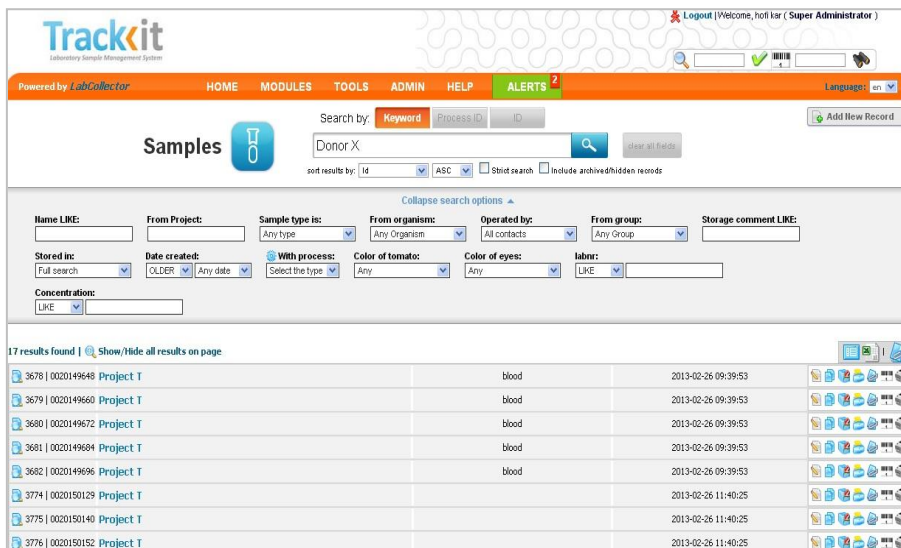

ORDERING INFORMATION

■ Track-IT Database Software		
RH81001	Track-IT Sample Management Software Full version (13 default modules, 5 simultaneous users) (Academic use)	unit
RH81002	Track-IT Sample Management Software Full version (13 default modules, 25 simultaneous users) (Academic use)	unit
RH81007	Track-IT Sample Management Software Full version (13 default modules, 5 simultaneous user) (Private use)	unit
RH81008	Track-IT Sample Management Software Full version (13 default modules, 25 simultaneous user) (Private use)	unit

INFORMATION

■ Track-IT installs on one computer that becomes the server. All other users can connect to it from any Internet browser.

Micronic has a broader product range then the products listed under ordering information. For our complete product portfolio, please send your e-mail to sales@micronic.com or contact us by phone.
